Abaid-ur-Rehman

Machine Learning Engineer | AI Engineer | Python Developer

abaidurrehman6790@gmail.com +92 308 9042467 Faisalabad, Pakistan Linkedin

Portfolio GitHub

SUMMARY

Machine Learning Engineer and Python Developer with hands-on experience building AI, Machine Learning, Computer Vision, Generative AI, LLM, and RAG applications. Skilled in Python, Flask, TensorFlow, Scikit-learn, OpenCV, FAISS, and modern LLM APIs, with experience developing intelligent, full-stack solutions for real-world problems. Passionate about designing practical AI systems and continuously exploring emerging AI technologies.

PROFESSIONAL EXPERIENCE

Nishat Mills Limited 08/2026 – 10/2026
Oracle Developer Intern Faisalabad, Pakistan
Gained hands-on experience with Oracle Forms, SQL, PL/SQL, database design, queries, triggers, and database-driven application development.

EDUCATION

NFC Institute of Engineering and Fertilizer Research 2023 – Present
Bachelor of Science in Artificial Intelligence Faisalabad

KIPS College 2021 – 2023
Intermediate (Pre-Engineering) Faisalabad

Allied School 2019 – 2021
Matriculation (Science) Faisalabad

SKILLS

Programming Languages
- Python
- SQL
- JavaScript
- HTML5
- CSS3
- PL/SQL

Soft Skills
- Problem Solving
- Analytical Thinking
- Communication
- Team Collaboration
- Continuous Learning

Machine Learning
- Machine Learning
- Deep Learning
- Supervised Learning
- Feature Engineering
- Data Preprocessing
- Model Training & Evaluation
- Predictive Modeling

AI & Development Tools
- Google Gemini API
- OpenAI API
- Anthropic API
- Groq
- OpenRouter
- Git
- GitHub
- VS Code
- Jupyter Notebook
- Google Colab
- Kaggle

Database & Backend
- Oracle
- SQL
- SQLite
- PostgreSQL
- Supabase
- SQLAlchemy
- REST APIs

Libraries & FrameWorks
- Flask
- TensorFlow
- Keras
- Scikit-learn
- OpenCV
- Pandas
- NumPy
- Streamlit
- PyMuPDF
- FAISS

Artificial Intelligence & Generative AI
- Large Language Models (LLMs)
- Generative AI
- Retrieval-Augmented Generation (RAG)
- Natural Language Processing (NLP)
- Prompt Engineering
- AI Chatbot Development
- Speech Processing
- Computer Vision
- Object Detection
- Image Classification

PROJECTS

StudyMind
AI, RAG / Generative AI / LLM
Technologies: Python, Flask, SQLAlchemy, FAISS, PyMuPDF, Google Gemini, OpenAI, Anthropic APIs, Flask-Login, Flask-Mail, JavaScript, HTML5, CSS3
- Developed a RAG-powered PDF learning platform using FAISS vector search and multiple LLM providers to generate document-grounded answers and AI explanations.
- Implemented PDF processing, semantic retrieval, authentication, and AI study tools including summaries, flashcards, quizzes, and learning assistance.

AI-Interviewer
Generative AI / LLM / AI Application
Technologies: Python, Flask, SQLAlchemy, Google Gemini API, Groq, OpenRouter, PyMuPDF, ReportLab, CodeMirror, Chart.js, JavaScript, HTML5, CSS3
- Developed an AI-powered mock interview platform supporting adaptive text, voice, and coding interviews with role-specific and resume-based questioning.
- Implemented multi-provider LLM integration, AI answer evaluation, performance scoring, readiness reports, interview integrity monitoring, authentication, and PDF report generation.

AI Resume Screening System
Generative AI / NLP / Recruitment AI
Technologies: Python, Flask, SQLAlchemy, Google Gemini API, Flask-Login, pdfplumber, ReportLab, Chart.js, Bootstrap 5, JavaScript, HTML5, CSS3
- Developed an AI recruiting platform that analyzes resumes against job descriptions using Gemini to generate match scores, skill-gap analysis, and candidate recommendations.
- Implemented team-based recruitment management, email verification, role-based access control, audit logging, filtering dashboards, and CSV/PDF report export.

RepoForge AI
Generative AI / Developer Tooling
Technologies: Python, Flask, SQLite, Google Gemini API, JavaScript, HTML5, CSS3, Mermaid.js
- Developed an AI-powered GitHub repository generator that creates professional documentation, workflows, licenses, templates, and project files using Gemini.
- Implemented hybrid AI/template generation, project history, live Markdown/Mermaid editing, ZIP export, and an AI-powered README improvement tool.

Nexus AI — AI Chatbot & Voice Assistant
LLM / Generative AI / Voice AI
Technologies: Python, Flask, Google Gemini API, Speech Recognition, Text-to-Speech, JavaScript, HTML5, CSS3, Marked.js, Highlight.js
- Developed a Gemini-powered AI chatbot and voice assistant supporting real-time conversations and voice-based interaction.
- Implemented multi-session chat history, Markdown and code rendering, speech recognition, text-to-speech, and voice-controlled system/web automation.

AI-Image-Generator
Generative AI / Image Processing
Technologies: Python, Flask, JavaScript, HTML5, CSS3, Pillow, Hugging Face API, JSON
- Developed a full-stack AI image generation application integrating Hugging Face models for text-to-image generation.
- Implemented prompt enhancement, image editing, history, favorites, search, sorting, and metadata management through a responsive interface.

Smart Waste Classification System
Deep Learning / Computer Vision
Technologies: Python, TensorFlow, Flask, OpenCV, NumPy, Keras, Chart.js
- Developed a deep learning application to classify waste into six categories using CNN-based image classification.
- Implemented image upload, real-time camera detection, prediction analytics, and recycling recommendations through a responsive Flask application.

ACHIEVEMENTS

- Developed and Applied modern AI , Computer Vision ,Python applications , Generative AI and Machine Learning techniques through hands-on projects.
- Worked with LLMs, RAG, FAISS, YOLOv8, Gemini , Open Router , Groq, and Hugging Face APIs.
